

EnergiePartners is a **fast growing** energy consultancy firm from Utrecht working towards a more **sustainable** world. Our contribution is stopping the squandering of energy at small and medium sized enterprises (SMEs).

We provide our customers **tangible** and **practical advice** that delivers instant value. Crucial aspect is getting entrepreneurs to **understand** their **energy usage** and our analysis of usage patterns by means of our main product the “Energieplanner”.

To further improve our energy efficiency software we are currently looking for a:

Developer

Activities

- Develop back-end functionalities (Python, MySQL, AngularJS)
- Translate user needs to keen technical solutions
- Improve user interface (HTML, CSS, ReactJS)
- Create smart data analysis and queries
- Peer review code of fellow developers
- Facilitate technical and acceptance tests
- Minor maintenance to our LEMP-stack

We offer

- ✓ The ability to make a difference through your job
- ✓ An informal working atmosphere
- ✓ Opportunity to foster own ideas and input
- ✓ Ongoing training and support to grow as an IT professional
- ✓ Choice: Bring-Your-Own-Device or use one of ours
- ✓ Enthusiastic colleagues
- ✓ Competitive compensation

You have

- A Bachelor or Master degree with proven knowledge and interest in IT
- A green compass
- Genuine interest in energy developments
- Excellent communication skills
- An eagerness to learn
- Ability to work both independent and in a team
- Strong analytical skills
- A minimal availability 28 hours per week
