

EnergiePartners is a young, sustainable company that aims to "Save energy together for a better world". Started as a sheer consultancy firm, we quickly started building our own apps and software for our customers in order to save them more, faster and prolonged CO2, energy and money.

This is also reflected in the people at EnergiePartners; greenly motivated, straightforward and flexible. In recent years we have also grown from 5 to 30 employees. We are happy to continue this growth!

For further development of our app we are looking for a:

Green Android Developer

Activities

- Development of front and back-end functionalities
- Translating user requests into smart solutions
- Improve user interface
- Peer review code from co-workers
- Write tests
- Work with modern Android libraries (Butterknife, Room, Jackson, Dagger2, LiveData)

We offer

-  The opportunity to make a visible contribution within a sustainable company
-  A free and flexible working environment
-  Opportunities for creativity, ideas and input
-  Time and support for your professional development
-  Choice: Bring-Your-Own-Device or use one of our devices
-  Enthusiastic, open-minded, down to earth colleagues
-  A competitive compensation

You are

- Advanced degree (Bachelor or Master) with clear knowledge and interest in IT
- Green motivation
- Interested in the evolving field of the energy transition
- Communicative
- Eager to learn
- Enthusiastic
- Self starter
- Analytical
- Available at least 28 hours a week

Interested?
